Career Objective

Motivated and detail-oriented Diploma holder in Automobile Engineering with one year of experience in logistics operations, including line haul coordination, shipment monitoring, and fleet readiness. Strong understanding of vehicle performance, route planning, and hub operations. Seeking a challenging role in logistics/transport operations where I can contribute to efficient line haul movement and operational excellence.

Professional Experience

TernX Logistics – Logistics & Line Haul Executive

(6 Months)

- Coordinated daily line haul schedules, ensured timely departures and arrivals of trucks.
- Monitored shipment movement across hubs and updated status in internal tracking systems.
- Coordinated with drivers to handle on-road issues, vehicle readiness, and route deviations.
- Managed line haul documentation including manifests, trip sheets, and LR entries.
- Assisted in load planning to optimize vehicle capacity and reduce turnaround time.

DTDC Logistics – Operations & Hub Associate

(6 Months)

- Managed inbound and outbound shipments, ensuring accurate sorting and dispatch.
- Verified parcel data, scanned consignments, and maintained real-time tracking updates.

- Coordinated with delivery executives and transporters for smooth movement of goods.
 - Assisted in line haul arrival processing, manifest checking, and hub flow management.
 - Resolved operational delays through effective communication with hub managers.
-

Internships

KSRTC Regional Workshop, Ernakulam – Intern Trainee (14 Days)

- Gained hands-on exposure to bus fleet maintenance and inspection procedures.
- Observed IC engines, transmission units, and suspension systems.
- Understood preventive maintenance schedules relevant to fleet operations.

Suzuki NEXA, Muttom – Intern Trainee (24 Days)

- Assisted in vehicle inspection and pre-delivery checks for customer readiness.
 - Learned diagnostics of engines, electrical systems, and safety components.
 - Improved communication and coordination through customer interaction tasks.
-

Projects

Layout of Air Conditioning System in an Automobile

- Designed the layout of an AC system, focusing on component placement and airflow efficiency.

Fabrication of Internal Combustion Petrol Engine Mini Jeep

- Participated in fabrication, assembly, and performance testing of a mini IC engine-based vehicle.
-

Skills

- Logistics & Line Haul Coordination
- Hub Operations
- Route Planning
- Fleet Maintenance Knowledge

- MS Excel (Basics)
 - Communication
 - Teamwork
 - Problem Solving
 - Adaptability
-

Education

Diploma in Automobile Engineering (2020–2024) – Grade B
XII (Science, 2019–2020) – 84%
X (2017–2018) – 93%
